

A natural extension of your organization.

It starts with understanding your specific needs.

The delivery of custom designed cables and interconnect solutions starts with you. We thoroughly research the challenges you're trying to overcome - going beyond a list of product specifications to fully understand your unique opportunities and business goals. Together, we create a vision for a comprehensive solution that suits your needs and moves your business forward.

We design, engineer, and prototype custom solutions for YOU.

Your unique challenges require custom solutions that off-the-shelf products just will not offer. Reducing variability is important in maximizing performance and reducing product failure.

Increase Reliability

We're with you every step of the way

- ✓ Design and Prototyping
- ✓ Assembly Production
- ✓ Delivery and Inventory Flow
- ✓ Custom Built Capabilities
- ✓ Cable Production
- ✓ IPC-A-620 Certified
- ✓ ITAR Registered

There are no off-the-shelf solutions at Mercury Wire. Our team of experts design the best product and services to meet your precise requirements. We fine-tune multiple iterations - giving every detail the consideration it deserves so that your solution is created the right way. The result is a higher quality product engineered specifically for your application.

Leverage Efficiencies

Through application of Lean Manufacturing best practices we are able to offer you enhanced quality, improved delivery and faster development time.

Lean operations mean fast turnarounds and higher quality.

We work collaboratively in an ultra-responsive, short run wire manufacturing operation with rapid prototyping capabilities. Our process allows us to continuously identify, adapt, and implement improvements quickly. Our systems and our team's flexibility ensure customized, high-value development programs.

Partnership you can count on.

Experience you trust.

Engineering and Prototyping

- Concept Exploration
- Design Services
- Material Selection
- Alternative Material R&D
- Production Planning

Cable Production

- Extrusion
- Striping and Marking
- Twisting and Cabling
- Braiding and Shielding
- Jacketing

Assembly Production

- Cut and Coil
- Terminations and Connectors
- Custom Molded Connectors
- Precision Molded Strain Reliefs
- IPC-A-620 Certified

Delivery and Inventory Flow

- Planned Lead Times
- Pull-Based Replenishment
- Simplified Transactions

Custom Built Capabilities

- Production Process Design
- Equipment Design and Build
- Custom Application Testing
